

SAFE-T-SWITCH®

Model SG1

LOW VOLTAGE A/C CONDENSATE OVERFLOW ALARM

Alerts building occupants immediately when the condensate overflow switch disables A/C equipment due to a drain clog. Allows for service before the building gets hot. Designed for use with Safe-T-Switch® and Safe-T-Probe® Condensate Overflow Switches and most other 24-volt overflow switches. Also works with the 24-volt overflow switch on most condensate pumps.

- SIMPLE TWO-WIRE DESIGN WITH BACK OR SIDE WIRE ENTRY PORTS.
- LEAD WIRE'S CAN BE EXTENDED WITH 2-STRAND THERMOSTAT CABLE TO LOCATE ALARM REMOTE FROM OVERFLOW SWITCH.
- FLASH LED AND PIEZO BUZZER
- UL LISTED

Package includes: 4-foot, 18 gauge lead wires, instructions and 2-sided mounting tape

Specifications: 24 volts AC Class 2, Piezo Buzzer, Flash LED indicator
